WORK EXPERIENCE

Full-Stack Developer <i>Avlokan/AS</i>	Feb 2025 – July 2025 Remote, India
- Architected and shipped the entire platform from scratch — video streaming (HLS + CloudFront), JWT auth, Razorpay payments, and admin dashboard — in under 4 months using React + Node.js + AWS. - Optimised CDN and media delivery pipeline, achieving sub-3s load times globally and sustaining 5,000+ concurrent users on product launch day with zero downtime. - Implemented PostgreSQL query optimisation and indexing strategy that cut average DB query time by 60%, enabling real-time analytics dashboards across 10,000+ student records.	
Associate Software Engineer <i>QTIMINDS</i>	Dec 2023 – Dec 2024 Remote, India
- Designed and deployed 12+ microservices on Kubernetes (EKS), reducing average API latency by 38% through connection pooling, Redis caching, and horizontal pod autoscaling. - Built and maintained CI/CD pipelines using GitHub Actions and Helm charts, cutting deployment time from 45 min to under 8 min and achieving 99.7% uptime across staging and production. - Led backend refactor of core authentication service (Node.js → Golang), reducing memory usage by 52% and supporting 3× user traffic without infrastructure changes.

PROJECTS

Netflix Clone	<i>React · Node.js · MongoDB · AWS S3</i>
Built a full-featured streaming platform with JWT auth, TMDB API integration, video playback, and user profiles — deployed on AWS with CDN-backed media delivery.	
Real Estate Platform	<i>Next.js · Node.js · PostgreSQL · Maps API</i>
Developed a property listing platform with interactive map search, advanced filters, saved listings, and an agent dashboard with real-time inquiry management.
