

ABHAY CHAURASIYA

DevOps Engineer · Go · CNCF Open Source Contributor

abhaychaurasiya19@gmail.com | github.com/abhay1999 | linkedin.com/in/abhay-chaursiya | India

TECHNICAL SKILLS

Languages	Go (Golang), JavaScript (ES2022+), TypeScript, Python, SQL, Bash
DevOps / Cloud	Kubernetes, Helm, Terraform, Docker, AWS (EKS, EC2, S3, CloudFront, Lambda), GitHub Actions, Jenkins, GitOps, ArgoCD
Backend	Node.js, Express.js, Go (net/http, gRPC), REST, GraphQL, WebSockets
Observability	Prometheus, Grafana, Alertmanager, Jaeger (distributed tracing), OpenTelemetry, SPM
Databases	PostgreSQL, MongoDB, Redis, MySQL

TECHNICAL EXPERIENCE — OPEN SOURCE CONTRIBUTIONS

Go Toolchain (golang/tools) (Official Go SDK · Reviewed by Alan Donovan, Google) Go Contributor · 1 Merged PR · Apr 2026
golang/tools · Ships in *gopls* — the official Go language server used by millions of developers in VSCode, JetBrains, and Neovim

- Added **slicesbackward analyzer** to *go/analysis/passes/modernize* suite — detects backward for `i := len(s)-1; i >= 0; i--` loops and suggests modernizing with `slices.Backward` (Go 1.23); 422 lines, full AST analysis pass with edge-case handling and golden-file tests. [PR #627](#)
- Contribution ships automatically in **gopls** (VSCode Go extension, JetBrains GoLand, Neovim) — modernization hint surfaces to every Go developer with Go 1.23+; fixes [golang/go#78484](#)

Jaeger – Distributed Tracing System (CNCF Incubating) Go Contributor · 4 Merged PRs · Mar 2026
jaegertracing/jaeger · Production-grade distributed tracing platform used at Uber, Netflix, and 1000s of orgs

- Built **Go SDK dashboard generator** for SPM observability stack (ADR-007 Step 2a) — programmatic Grafana dashboard generation replacing static JSON, enabling dynamic metric configuration across the monitoring pipeline. [PR #8216](#)
- Added **CI sync-check workflow** to validate generator output against committed dashboards (ADR-007 Step 3) — prevents dashboard drift in CI/CD. [PR #8240](#)
- Fixed **jaegermcp server** to enforce response size limits — prevents unbounded output in tool responses, improving reliability of MCP integration. [PR #8242](#)
- Restored **Grafana + SPM** service in docker-compose observability example, unblocking users running the full monitoring stack locally (ADR-007 Step 1). [PR #8215](#)

Helm – Kubernetes Package Manager (CNCF Graduated, 29k+ ★) Go Contributor · 1 Merged · 2 Open PRs · Mar 2026
helm/helm · The de-facto standard for Kubernetes application packaging

- Removed **legacy Go import path comments** from *pkg/kube* package — Go module-based projects no longer require these, keeping codebase clean and idiomatic. [PR #31931](#)
- (Open) Fixing `values.yaml` null-override bug — parent-defined subchart defaults should be erased when user explicitly sets `null`. [PR #31976](#)

GoReleaser + Other Notable Contributions 1 Merged · 11 Open PRs across CNCF ecosystem

- Fixed **filterOut tag selection bug** in GoReleaser — function returned the excluded tag instead of remaining tags when multiple `ignore_tags` patterns configured. [PR #6462](#)
 - (Open) Security fix for **Argo CD** — added `X-Frame-Options` and `Content-Security-Policy` headers to Swagger UI endpoints. [PR #26918](#)
- Additional open PRs: *tektoncd/pipeline* (perf), *kgateway-dev/kgateway* (Helm/fix ×2), *grafana/grafana* (security), *docker/cli*, *NVIDIA/NeMo-Retriever* (Helm), *meshery/meshery*, *jenkinsci/jenkins*

PROJECTS

Self-Healing K8s Platform Go · Kubernetes · Prometheus · Helm · GitOps

- 3 custom Go operators for automated `CrashLoopBackOff` detection and pod remediation; 47+ incidents resolved autonomously with alert-driven healing via Prometheus + Alertmanager.

Dev Environment Platform Go · Kubernetes · CLI

- Go CLI to spin up isolated MERN / React / Go+PostgreSQL dev stacks on K8s in a single command — automated namespace provisioning, port-forwarding, and teardown in <15s.

Netflix Clone on AWS EKS EKS · Terraform · Jenkins · Docker · Trivy

- End-to-end DevSecOps pipeline — Terraform EKS, Jenkins CI/CD, SonarQube, Trivy scanning (0 critical CVEs), Prometheus + Grafana monitoring stack.

AvlokanIAS – E-Learning Platform React · Node.js · AWS · PostgreSQL

- Full UPSC e-learning platform built from scratch — HLS video streaming via CloudFront, JWT auth, Razorpay payments; sustained 5,000+ concurrent users on launch with zero downtime.

Developer Portfolio Next.js · TypeScript · Docker · Framer Motion

- Built with live GitHub API, interactive DevOps terminal playground, CI/CD health monitor, contribution heatmap, and ThoughtWorks-style Tech Radar — containerised with Docker + Nginx.

EDUCATION

Integrated B.Tech + M.Tech – IT 2018 – 2023
ABV-IIIT Gwalior (Indian Institute of Information Technology)
CGPA: **7.32 / 10**

ACHIEVEMENTS

- 🏆 **LeetCode**: 600+ problems solved — Easy 220+, Medium 310+, Hard 70+; HackerRank 5★ Problem Solving.
- 🌐 **Open Source**: 7 merged PRs — **golang/tools** (Go toolchain, reviewed by Alan Donovan), *Helm*, *Jaeger* (×4), *GoReleaser*; 11+ open PRs across Argo CD, Grafana, Tekton, Docker & more.
- 🔧 **Portfolio**: Live DevOps playground, CI/CD health dashboard, GitHub contribution heatmap, ThoughtWorks-style Tech Radar — github.com/abhay1999

CORE COMPETENCIES

- ◆ Kubernetes Operator Development
- ◆ Go Microservices & CLI Tools
- ◆ CNCF Open Source Contribution
- ◆ DevSecOps & Security Hardening
- ◆ CI/CD Pipeline Automation
- ◆ Observability & Monitoring
- ◆ Infrastructure as Code (IaC)
- ◆ Cloud-Native Architecture (AWS)
