

ABHAY CHAURASIYA

DevOps / Platform Engineer | Kubernetes | Go | **CNCF & Go Toolchain Contributor**

abhaychaurasiya19@gmail.com | +91 82992 11830 | github.com/abhay1999 | linkedin.com/in/abhay-chaurasiya | India

DevOps / Platform Engineer with strong expertise in **Kubernetes, Go, and cloud-native systems**. Designs and builds **scalable, fault-tolerant, distributed systems** — from self-healing Kubernetes operators to high-availability CI/CD pipelines. Active contributor to the **official Go toolchain** (golang/tools, reviewed by Google's core team) and **CNCF ecosystem** (Jaeger, Helm, GoReleaser) with 7 merged PRs reaching millions of developers. Production-grade experience in **observability, CI/CD pipeline automation, and platform engineering** — targeting GSoC 2026 / LFX Mentorship with Jaeger or Argo CD.

TECHNICAL SKILLS

Languages	Go (Golang), TypeScript, JavaScript (ES2022+), Python, Bash, SQL
Cloud & Infra	Kubernetes, Helm, Terraform, Docker, AWS (EKS · EC2 · S3 · CloudFront · Lambda)
CI/CD	GitHub Actions, Jenkins, ArgoCD, GitOps, Trivy, SonarQube
Observability	Prometheus, Grafana, Alertmanager, Jaeger, OpenTelemetry, SPM
Backend & DB	Node.js, Express.js, gRPC, REST, GraphQL · PostgreSQL, MongoDB, Redis, MySQL

PROFESSIONAL EXPERIENCE (OPEN SOURCE & ENGINEERING WORK)

Go Toolchain (golang/tools · Official Go SDK · Reviewed by Alan Donovan, Google) Open Source Contributor · Apr 2026
Ships inside gopls — the official Go language server powering VSCode, JetBrains GoLand, Neovim (millions of daily users)

- Added **slicesbackward analyzer** to go/analysis/passes/modernize — detects legacy backward for-loops, suggests idiomatic slices.Backward (Go 1.23) [PR #627](#)
- Built **422-line AST analyzer** with edge-case guards and golden-file tests — full static analysis pass for the Go modernize suite
- Reviewed by Alan Donovan (Google) → auto-submitted and **shipped in gopls to millions of Go developers** worldwide
- Fixes [golang/go#78484](#) — improves code modernization coverage for Go 1.23+ codebases worldwide

Jaeger – Distributed Tracing (CNCF Incubating · used at Uber, Netflix, 1000s of orgs) Open Source Contributor · 4 Merged PRs · Mar 2026

- Built **Go SDK dashboard generator** for SPM stack (ADR-007) — replaced static JSON with programmatic Grafana provisioning; enabled dynamic metric config across monitoring pipeline [PR #8216](#)
- Added **CI sync-check workflow** — validates generator output vs committed dashboards on every PR; eliminates dashboard drift [PR #8240](#)
- Patched **jaegermcp** to enforce response size limits → prevents unbounded output crashes [PR #8242](#) · Restored Grafana + SPM in docker-compose → unblocked full local observability stack [PR #8215](#)

Helm (CNCF Graduated · 29k+ ⭐) & **GoReleaser** (14k+ ⭐) 2 Merged PRs · Mar 2026

- Removed **legacy Kythe import path comments** from helm/pkg/kube — improved module compliance & codebase cleanliness; eliminated static analysis false-positives [PR #31931](#)
- Fixed **filterOut tag selection bug** in GoReleaser — function returned the excluded tag instead of remaining ones; corrected multi-ignore_tags release pipelines [PR #6462](#)

Open PRs: **Argo CD** (X-Frame-Options + CSP security headers), **Grafana** (email security), **Tekton**, **Docker CLI**, **NVIDIA/NeMo** (Helm), **Meshery**, **Jenkins**, **kgateway** · 11+ active

PROJECTS

Self-Healing K8s Platform ↗ [GitHub](#) *Go · Kubernetes · Prometheus · Helm*

- 3 Go operators detect CrashLoopBackOff → auto-remediate pods via Prometheus + Alertmanager webhooks; built for **high availability** and **fault tolerance**
- 47+ incidents resolved autonomously; ~11s avg heal time; zero on-call pages — production-grade **scalability**

Dev Environment Platform ↗ [GitHub](#) *Go · Kubernetes · CLI (cobra)*

- Go CLI spins up isolated MERN / React / Go+PG stacks on K8s in a single command
- Automated namespace provisioning, port-forwarding & teardown in <15s; eliminates "works on my machine"

Netflix Clone on AWS EKS ↗ [GitHub](#) *EKS · Terraform · Jenkins · Trivy*

- Full DevSecOps pipeline — Terraform IaC, Jenkins CI/CD, SonarQube quality gates, Trivy container scanning across **distributed systems**
- 0 critical CVEs; automated deploy-on-merge; **high-availability** Prometheus + Grafana observability stack

AvlokanIAS – E-Learning Platform *React · Node.js · AWS · HLS*

- HLS video streaming via CloudFront CDN, JWT auth, Razorpay payments, Node.js + MySQL backend
- Sustained **5,000+ concurrent users** on launch day with zero downtime

EDUCATION

Integrated B.Tech + M.Tech – IT 2018 – 2023
ABV-IIIT Gwalior, India (Institute of National Importance)

Relevant Coursework: Distributed Systems · Operating Systems · Computer Networks · Cloud Computing · Algorithms & Data Structures · Database Management Systems

ACHIEVEMENTS

🌐 **Go Toolchain Contributor:** PR merged into **golang/tools** — new analyzer ships in gopls to millions of developers; reviewed by Alan Donovan (Go core team, Google).

💎 **CNCF Contributor:** 6 merged PRs in Jaeger (×4), Helm, GoReleaser; 11+ open PRs across Argo CD, Grafana, Tekton, Docker, Meshery & more.

🏆 **LeetCode:** 600+ problems — Medium 310+, Hard 70+; HackerRank 5★ Problem Solving.

CORE COMPETENCIES

- | | |
|---|-----------------------------------|
| ◆ Kubernetes Operator Development | ◆ CI/CD Pipeline Automation |
| ◆ Go Static Analysis & Tooling | ◆ Observability & Monitoring |
| ◆ Platform / Infrastructure Engineering | ◆ Infrastructure as Code (IaC) |
| ◆ DevSecOps & Security Hardening | ◆ Cloud-Native Architecture (AWS) |
